

Request for Installation Support

Powder-X Coating Systems provides Installation support for products we manufacture directly to the purchaser of the equipment at no charge. Installation support is not available on used equipment. Owner's manuals, which include Installation Instructions, are provided with all Powder-X manufactured equipment at the time of purchase. Additional copies of the User's Manual and schematics can be purchased for \$300.

All Installation Support must be initiated with this form. Once the form is submitted and reviewed, someone will respond (1) with an answer (2) requesting more information or (3) setting up a time for a telephone call.

Please note: Most installation issues can be resolved by looking at the step-by-step instructions (which are generic) and reviewing the supplied drawings that are particular to the appliance.

Please make sure all information on this form has been provided accurately and completely before requesting Installation support.
